SUMMARY

Passionate Software Engineer with military leadership acumen and robust technical experience in full stack development via ReactJS, Python, and AWS Cloud technologies. My dedication to mentorship and collaborative problem-solving drives my aspiration to become a lead software engineer. I believe in the power of open communication and teamwork to deliver exceptional results. Let's connect and explore potential collaborations and create impactful software solutions together.

TECHNICAL SKILLS

Languages: Javascript, Java, Python, TypeScript

Frameworks and Databases: ReactJS, NodeJS

Databases: GoogleSQL, PostgreSQL, MySQL

Cloud Platforms: AWS Cloud Practitioner, GCP

CI/CD: Jenkins, Concourse CI/CD

Tools/Other: Restful API, Docker, Pivotal Cloud Foundry, Agile Development, UI/UX, Jira

WORK EXPERIENCE

Software Engineer, Home Depot | Aug 2016 - Nov 2017

- Successfully led the migration of over \$5 million of customer data from Teradata to Google Cloud BigQuery, employing JavaScript, Java, Python, and Jenkins CI/CD pipelines.
- Developed Home Depot's first production analytics application, streamlining data analysis during the migration to Teradata.
- Provided Google Cloud Technology solutions for Big Data analysis and designed intricate data models using BigQuery nested structures.

Combat Camera Team Lead, 55th Signal Company, US Army | Jan 2018 - Jan 2024

- Spearheaded social media and media production for the US Army, elevating brand awareness and forging 500 company partnerships.
- Chronicled over 200 DoD operations and humanitarian aid missions, showcasing proficiency in multimedia storytelling.
